

DISPOSITION OF BOARD MONIES CAUSES DEBATE

Swimming Pool Committee Fails to Get \$500 Contribution

A motion which provided for the Board of Trade to turn over to the swimming pool committee the sum of \$500 was defeated at the board meeting held in the Hotel Ross on Wednesday, Sept. 14th.

The motion was put by Geo. Travis, chairman of the swimming pool committee. Mr. Travis argued that his committee had already raised more than \$1000, which was not sufficient to build a good permanent pool. His committee was planning to return to the bank on Monday or Tuesday last.

Mr. and Mrs. D. G. Travis of the board, passed through the colony on Monday on their way to Bassano.

TWO CARS SMASH WEST OF TOWN

Bus Blinds Driver Who Crashes Into Car Going Same Direction

Two cars were badly smashed up in a collision on the Bassano-Husar road at about 4:45 Monday evening, Sept. 13th. No one was seriously injured. The accident happened about a half mile north and three and a half miles west of Bassano.

Driving a Dodge sedan, 7. Lawton of Husar, was driving west when he crashed into the rear end of an Oldsmobile touring car driven by L. Purdy, of Husar. Purdy was also going west. Purdy had stalled on the road when he ran out of gasoline, and was just starting again when Lawton came along and bumped into him.

Lawton's car was badly smashed up. The Oldsmobile was also badly damaged. The driver of the Oldsmobile, L. Purdy, was not injured.

Many Attend Scouts' Sale and Corn Supper

The afternoon tea, corn supper, and sale of home cooking was on at the local boy scouts last Saturday in the scout hall was a successful affair.

The afternoon tea was not very well attended because of the rain, but many came in to partake of the corn supper, and of the home cooking, everything was sold.

The scouts had a very fine time of it, and the sale was very successful.

HARVEST AGAIN DELAYED BY HEAVY RAINS

Weather Signals Are Now Hot for a Fine Spell

Heavy rain last Saturday and more today and Wednesday has again led up harvesting and threshing operations in Bassano and surrounding district.

Saturday's rain was one of the heaviest that has visited Bassano this year. On the rain gauge at the dam more than two and a half inches of water was registered.

The weather cleared off Wednesday, and the rain gauge at the dam showed only a few drops.

After long tests we are convinced Aluminum is the best container for tea.

TEA "is good tea"

Now packed only in Aluminum.

Wild Life Of Western Canada

Not least among the attractions that Western Canada has for many people, whether permanent resident, tourist or sportsman, is the abundance and variety of its wild life, and now that the hunting season is at hand it is opportune to make something more than a passing reference to the value of this great asset to all of our Western Provinces.

Judged from all standpoints the wild duck and geese, prairie chicken, partridge, and other game birds and mammals are of great value to this country. They constitute a picturesque feature of life on the prairies and are a constant source of delight to the lover of nature. What greater pleasure can be had than to witness the flight of duck in the early dawn or as the sun sinks to rest? A man may be of a very violent nature indeed who does not get as thrilled as he watches them winging their way across the sky.

To the hunter our game birds offer the best of opportunities for the display of the keenest manhood, coupled with the best sportsmanship and, and finally, they provide a welcome addition to our food supply—a delicacy appreciated by all.

Later in the season comes the opportunity for the big game hunter to match his craft and skill with the deer and moose. In a word, the wild life of the West is a drawing card for thousands of people. Without these game birds and animals the West would not be the West which attracts and holds.

But human nature being what it is, it became necessary for governments by legal enactments to protect these friends of man from man himself. As a result, the open season for shooting has had to be curtailed, and the address of "bags" greatly restricted in order to save birds and animals from extermination. And it is only through the strict observance of these laws, and a rigid compliance with all regulations, that a further curtailment of privileges now enjoyed can be avoided. Laws have been passed and regulations are enforced by governments, not for the purpose of depriving hunters and citizens generally of the privilege of shooting, but in their own interests that it may be preserved and continued to them.

There are still some individuals in this world who wrongly style themselves "sportsmen," who consider it sport and something to be proud of and boast about to shoot an inordinately large number of birds in a day or a season. These individuals rarely in having their photographs taken, run in a hand, and with their "kill" displayed around them. The real sportsman, and the true citizen, looks upon all such exhibitions with regret and a beating conscience. It is one thing to shoot for food, or for an hour or two of the real thrill that comes to the true hunter, but quite another to engage in a war of extermination against the game. The man who will kill and kill for the sake of a name, or to show his prowess, is not a sportsman, and on the contrary, he is the enemy of all sportsmen, and, in the final analysis, his own enemy. In the language of the old fable, he is destroying the goose that lays the golden eggs.

The writer of this article has no desire to preach; he is not a killjoy. But he would, even on the remote grounds of self-interest, not to mention more lofty motives, urge all the people of Western Canada, to constitute themselves unofficial game guardians,—to fully and loyally observe the spirit and letter of the game laws themselves, and see to it that other people do likewise.

Aviation Enters New Era
The recent fabrication of a country-wide system of air express marks the passage of aviation from its present era of stunt stuff with its inevitable high cost to human life, to the comparatively safe and economical mode of every day commercial use. In the opinion of R. M. M. Cowles, president of the American Railway Express Company:

"She—I've been married three times—and each time my husbands have been William."
"He—I'm just a clever Bill collector."

Another experiment to hasten trans-Atlantic mails is being made. Planes will overtake and drop mail on liners far out to sea.

According to British research experts, London's smoke cloud exhalates nearly two-thirds of the beneficial ultra-violet rays of sunlight from that city.

CHILDREN CRY FOR

Fletcher's CASORIA

MOTHER—Fletcher's CASORIA is especially prepared to relieve infants in colic and children in all cases of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels; aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitation, always look for the name of **Fletcher's** Absolutely Harmless—No Opium. Physicians everywhere recommend it.

North Best For Whites

Tropics Only Suitable For Colored

Five days before the war broke out, the white races would eventually turn toward the polar regions in search of new homes. Dr. R. N. H. Brown, president of the Geographical section, told the British Association for the Advancement of Science at a meeting in Leeds, England, that the white races would eventually turn toward the polar regions in search of new homes.

"There is no real evidence that the whites are suited for permanent residence in the tropics," Dr. Brown declared. "All evidence that is soundly suggests that the colored races will eventually occupy the warm lands."

"Eventually the life of white settlement will definitely set northward, even to the Arctic seas, and in its good destiny the present inhabitants."

Removes Touchy Corns Brings Solid Comfort

Acts like magic—takes all the pain—removes corns and calluses in a few seconds. That's how "Putnam's" Corn Extract works. It's not to be disappointed with "Putnam's" Corn Extract. It's not to be disappointed with "Putnam's" Corn Extract. It's not to be disappointed with "Putnam's" Corn Extract.

Another Evolution Theory

British Zoologist Thinks Man Developed From Jelly Fish

If you are musical, like dancing, or have political instincts, you may thank your jelly fish progenitors of some age in the opinion of Dr. G. P. Bidder, British zoologist. Dr. Bidder offers the theory that man developed from the jelly fish. He says that the jelly fish, in the opinion of Dr. Bidder, is the ancestor of man.

Our appreciation of dancing, poetry and jazz music is due to the jelly fish. The jelly fish is the ancestor of man. The jelly fish is the ancestor of man. The jelly fish is the ancestor of man.

MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than the benefit conferred by her child. Mothers everywhere who have used Baby's Own Tablets for their children speak in enthusiastic terms of them. For instance, Mrs. Zephaniah Taylor, Three Rivers, Que., writes: "Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels, and make him plump and well. I always keep a box of the Tablets in the house for my children, and advise all mothers to do likewise."

The baby ailments of childhood arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. They break up colic and indigestion, relieve constipation and indigestion, break up colic and indigestion, relieve constipation and indigestion.

In Abyssinia, a telephone message must first be written and handed to an operator who uses a device to transmit the message. No one else is permitted to use the instrument.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

French Scientist Poorly Paid

Edward Branly Has Worked Forty Years Under Trying Conditions. "Edward Branly is cited by newspapers as typifying the struggle of French scientists to work under miserable conditions. Branly is inventor of the condenser. France calls him the 'father of the wireless.' Branly has as his only assistant in a ramshackle 'laboratory' an aged woman who ekes out a living by selling extra heads of horses and other horses. This maid of all work is now the scientist's 'laboratory' assistant. She was intelligent and the professor trained her in his work. For fifty years Branly has worked under these conditions, drawing a salary of about \$15 a month as professor and supporting his family by occasional papers as a physician. These facts are told by French papers in an article illustrating the need to pay well men who give their lives to science."

The speediest bacteria can travel only about four inches in 19 minutes. Minard's Liniment sours fast.

ECZEMA A GREAT HEAL

Over Face, Neck and Hands. Cuticura Heals.

"Examine bottle at all over my face, neck and hands. It was in eczema and itched a great deal. My skin was awful sore and red, and sometimes it would bleed. I used water and soap and it made me feel worse. I used Cuticura and it healed me. I used Cuticura and it healed me. I used Cuticura and it healed me."

The speediest bacteria can travel only about four inches in 19 minutes. Minard's Liniment sours fast.

WHEN USING WILSON'S

READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

Best of all Fly Killers—10c and 25c per packet at all Drugstores and General Stores.

Operates Restaurant "Plane"

Added To Paris-London Service By French Aviation Company. A "restaurant plane" has been placed in daily operation on the all-lin between Paris and London by the French Aviation company, the Air Union, according to reports to the Department of Commerce from W. H. Kelley, automotive trade commissioner to Europe.

A cold luncheon is served, including hot soups, lobster, duck, veal, ham, salad, cheese, fruit and coffee, with wine or water. In the car there are electric stoves for heating food, and a pilot, a radio operator, cook, waiter and ten passengers.

The plane carries a pilot, a radio operator, cook, waiter and ten passengers. The plane carries a pilot, a radio operator, cook, waiter and ten passengers.

Like a Grip at the Throat

For a disease that is not classed as fatal there is probably no more distressing and more terrible suffering than asthma. It comes unbidden, the sufferer has no control over it, and it is a constant source of worry and distress.

Dr. Kellough's Asthma Remedy is a wonderful remedy for asthma. It is a constant source of worry and distress. It is a constant source of worry and distress.

Proposes Scientific Holiday

Bishop Of Ripon Would Drop Work For Ten Years

Feeling that his present amusements to amusement have been aroused in British circles by the suggestion from the Rt. Rev. Edward Arthur Baring, Bishop of Ripon, for a ten-year scientific holiday.

Dr. Daniel Hall, scientific adviser to the Board of Agriculture, is quoted as saying the proposition equivalent to asking the business man who finds difficulty in keeping up his head commercially to stay in bed for a certain length of time in order to save money and expense.

The Archbishop of Abol, president of the Education Session of the British Association for the Advancement of Science, said that he was in agreement with the suggestion. He said that he was in agreement with the suggestion.

Dr. Oliver Lodge said that for the Bishop's criticism referred to only the application of science by the world. He said that he was in agreement with the suggestion.

Cable Business Not Affected By Wireless

Prophecy That Its Days Were Numbered

When, twenty years ago, Marconi first succeeded in sending wireless telegrams from Newfoundland to England, many people prophesied that the days of the submarine cable were numbered.

The reasons of this prophecy is proved by the fact that during the first four months of this year, the value of the submarine telegraph and telephone cables sent out from the United Kingdom amounted to £215,758. Even this sum, though it is less than the average, owing to the fact that the trade has not yet recovered from the effects of the coal strike.

Although the early cables were slow, the invention of wireless telegraphy and telephony spurred the cable companies to fresh effort. The result was the discovery of a new alloy nickel and iron which, treated by a secret process, proved to have a conductive power thirty times greater than that of the best soft iron.

The new metal was named Permalloy, and its efficiency is shown by the fact that the new cables send more than two thousand letters a minute through the newest, trans-Atlantic cable without any perceptible delay.

Now developments have gone so far that the cables can carry a hundred letters a minute through the oldest cables.

Now developments have gone so far that the cables can carry a hundred letters a minute through the oldest cables. Now developments have gone so far that the cables can carry a hundred letters a minute through the oldest cables.

Makes Curious Discovery

Lead Made Of Three Different Atoms

Dr. F. W. Aston, distinguished physicist of Cambridge University, and one of the foremost investigators of the structure of the atoms of matter, has proved that there are at least three different kinds of lead in a lump of ordinary lead and perhaps several other kinds in addition.

In a letter to the London scientific periodical, Nature, Dr. Aston describes recent experiments in which atoms of lead were made to fly across, in the form of a gas, between the poles of an exceedingly powerful magnet. The enormous magnetic force to which these atoms were subjected sorted them out into different kinds of lead in somewhat the same way in which an ordinary magnet will sort out lead bullets from steel ones.

The three kinds of lead which Dr. Aston has found are all "lead," so far as their appearance and chemical properties are concerned. The difference is that the atoms of the three different kinds have three different weights. The heaviest of the three is about 1 per cent heavier than the lightest, with the third one intermediate in weight between these two. Dr. Aston is a naturalist of the highest order, and his discovery is a most important one.

Dr. Aston has discovered previously that lead is made up of other elements can exist in two or more different forms, also distinguished by the weights of their atoms. These are named isotopes, sometimes called "atomic twins." Ordinary lead, the new results prove, is not twins but triplets.

Old Hudson's Bay Fort Rediscovered

Trapper Has Found Cache Abandoned Over Century Ago

Old Fort Mallett, in the Liard River country, abandoned almost one hundred years ago by the Hudson's Bay Company, has been rediscovered by Alhambra Deltell, trapper, who has been searching for it since he was a boy. The discovery was made by an expedition of the Geological Survey to find the old post, but without success.

Dr. Aston has discovered previously that lead is made up of other elements can exist in two or more different forms, also distinguished by the weights of their atoms. These are named isotopes, sometimes called "atomic twins." Ordinary lead, the new results prove, is not twins but triplets.

WOULD Sell Canada To the Canadians

Citizens Do Not Yet Realize Greatness Of Dominion

"Let us sell Canada to ourselves, first, then let us add it to ourselves," urged Howard Stutchbury, Trade Commissioner of Alberta, who spoke in Toronto at the Alberta bazaar, given in the Women's Building, C.N.E., by the Ontario Department of Agriculture for representative of the various provinces of the Dominion who were in charge of the exhibit in the Women's Institute.

"Adopt that as your slogan and in ten years we will have Canada occupying the place she should occupy," said Mr. Stutchbury, who has been in Toronto at the bazaar, who spoke in Toronto at the Alberta bazaar, given in the Women's Building, C.N.E., by the Ontario Department of Agriculture for representative of the various provinces of the Dominion who were in charge of the exhibit in the Women's Institute.

May Pass Legislation To Put An End To Trans-Atlantic Flying

Ottawa.—(Special) may be asked to pass legislation at the next session to stop trans-Atlantic flying to and from the Dominion. This was the intention made by Premier King in referring to recent requests made to the Government to prevent air flights from Canada across the Atlantic Ocean.

The Prime Minister stated that the Government was at present powerless to stop trans-Atlantic flights from this country. The Royal Windsor, the last Canadian plane to attempt to reach England, remarked Premier King, was outside of Canada at any rate.

The Government, intimated the Prime Minister, was of the belief that the "policy" of this country "has been strictly of the view that there has been no air flights should discontinue" it was hoped that public opinion, at least these flights, would have the effect of deterring use of wealth from financing attempts to cross the Atlantic.

"There is considerable for a general flight," commented Mr. King.

Fighting Epidemic

Infection—Rapidly Takes Toll of Life

Winnipeg.—Health authorities in the widely separated districts of Edmonton, Alta., and the Kootenay area in British Columbia, were meeting their forces to battle an epidemic of influenza-typhoid, when to date has taken a toll of 25 cases, mostly children of school age.

The outbreak in Edmonton alone has accounted for nine deaths, while the children were under treatment today in isolation hospitals, 14 children form the disease has manifested itself in Nelson, B.C., Trail and Kamloops, where a total of 45 cases have been reported, of which 15 proved fatal.

Public schools in the area of infection have been closed and every precaution known to medical science has been taken to prevent further spread of the epidemic.

A 20-year-old youth was the latest victim in Rosedale, B.C., while two new cases were reported in Kelowna and Trail.

Pioneer Of West Dead

Capitan Bruce Griegs Brought Early Settlers Into Dominion

Winnipeg.—Cap. Bruce Griegs, early one of the most picturesque figures of the Red River settlement frontier days, is dead in Seattle, Wash.

Cap. Griegs was one of the pioneers connected with the steamship transportation system between the Northwest States and Canada, bringing many settlers into the Dominion prior to the completion of the first transcontinental railway line in 1909.

Prepared Network Of Airways—A network of future airways throughout England may come into being in the near future with a view to the feeding of air routes to the continent. The Imperial Airways has already set up a scheme whereby passengers from the provinces in the continent travel by air to the west coast of England, where internal lines will be valuable for the transportation of goods.

Lowest Birth and Death Rates—London.—The lowest birth rates ever recorded in England and Wales, except in the time of the 1915-16 season, are shown by the figures for the year 1925. The 1925 report shows 710,653 births and 473,000 deaths.

Predict Early Winter—Kewland, Conn.—Two hawks of wither have been seen flying south and this winter. The early appearance of the birds, which usually do not migrate until fall has set in, is a prediction of an early and severe winter. Sportsmen fear the season will be more severe than the hunting season opens.

Canadian Minister Attacked—Paris.—An attempt on the life of Mr. Spaulding, Quebec Minister of Commerce, was made by a man named Spaulding, who was shot at the minister. Mr. Spaulding escaped unhurt but his leg was seriously wounded.

W. N. W. 1928

STRONGER URGE FOR REDUCTION IN ARMAMENTS

Ottawa.—(Special) competitive armaments create an atmosphere of war and that reduction of armaments should be doggedly fought for and achieved was the outstanding feature of the address at the League of Nations Assembly.

The Japanese delegate, Matsuoka, said Japan ardently desired that ruthless competition in armaments should be brought to a standstill and lowered to a level strictly essential to national security. He pledged his country's co-operation with the League's preparatory disarmament commission, which another speaker, Erik Lofgren, Foreign Minister of Sweden, insisted was the best means to achieve the great military power of the world.

"The order is a guarantee of the fact that it is carried out," said the French expert of the Preparatory Commission, "and for the fact that it means Vancouver will become one of the greatest grain ports in the world, third of fourth."

British Columbia still had a complaint, however, he asserted, pointing out that the rate on the 888 miles rail to Quebec City had been placed at 41 cents, while the rate on the 642 miles haul to Vancouver was 20 cents.

"We don't care what the rate to Quebec is," he declared, "but we do care how low it is to be able to help Quebec to get the business away from New York. But Vancouver wants the rate to be as low as New York as it is a Quebec."

A new movement of amendments to immigration and naturalization laws is being worked out by experts in the department in anticipation of action upon that subject at the next session.

"Secretary of Labor Davis, returning today from his inspection of border operations," outlined his plans to his assistants and announced that he would, in the future, it was said, will be on a more strict basis.

"Changes in the law to be proposed include revision of laws so as to smooth out present difficulties with Canada and permit Canadian citizens to work in American border towns, such as Detroit and Buffalo, without undue hardship."

Large Number On Payroll—In the Pan, Man.—Owing to a number of men being laid off, the work of dismantling at Port Nelson and transportation of machinery and equipment from there to Port Churchill, there is now 1,450 men on the payroll of the Hudson Bay Railway. It is the intention to get the work done before the summer closes, so that port operations may be commenced there early in the spring.

Leave For Hudson Bay—Montreal.—Following upon the departure of the Canadian Government merchant marine steamer, Canadian Mariner, for Hudson Bay, via Sydney, N.S., where a cargo of coal will be loaded, the departure of a railway train from Montreal, which is now in the hands of the Canadian Government, has been delayed.

Will Of J. Ogden Armour—Left An Estate Valued At One Million—Chicago.—The will of J. Ogden Armour, who was worth an estimated \$100,000,000, was left for probate and disposed of an indicated estate of \$1,000,000.

The will left \$100,000 outright to his daughter, Lolla, now Mrs. John J. Mitchell, Jr., and as an annuity of \$10,000 to her husband.

The remainder of the estate, except for a few minor bequests of from \$1,000 to \$5,000 to servants, was left in trust for the benefit of the widow and daughter.

John Oliver's Will—Vancouver.—Probate was granted on the will of Mr. Justice-McCormick of the late Premier John Oliver, who died in a four-page document dated July 1915 and signed "John Oliver" the testator disposed of a gross estate of \$79,919, which he bequeathed to his wife, so that the net estate was \$75,000.

Mr. Oliver died August 17 at Victoria. The widow, Mrs. Oliver, and three daughters are the sole beneficiaries.

Starts Aerial Mail Service—Montreal.—Canada's first attempt to start an aerial mail service was made September 7, when Major Tupper, of the Canadian Aerial Service, dropped off from the Canadian "Vickers" yards at Malabarwood aboard a Vickers Vimy for Paris.

When he made arrangements to take mail off the Hudson of France, where the mail was in the hands of Mr. J. Lawrence, a Frenchman.

Return From Visit To England—Hon. J. E. Brownlee, premier of Alberta, returned from his visit to England, from left to right: A. J. McPhail, president of the Canadian Co-operative Wheat Producers' Association, and Mrs. Brownlee are shown in the photo.

French Grateful For British Sympathy

Paris.—(Special) French art and statements have been very grateful for a "golden book" which has been given by Foreign Minister Briand and other Government officials to Sir Austen Chamberlain and Clemenceau, respectively.

The Minister of Foreign Affairs explains the motive of the gift—gratitude for the British sympathy and aid. The Premier stresses the importance to world peace of Anglo-French co-operation and at the same time expresses French admiration, sympathy and affection for Britain.

M. Clemenceau, the wartime Premier, writes: "Free love exists not in the telling but in the proving."

The book contains views of the most interesting states in France and the founder-wide competition for the best designs for Canadian new nickels and quarters. The new coins will mark the Diamond Jubilee of Confederation.

Prominent Financiers Express Faith In The Prosperity Of Canada

Esquimaux Suffer From White Man's Diseases

Contact Is Slowly Changing Their Character Says Dr. Banting.

Toronto.—The Eskimos are not yet racially immune from the white man's diseases, according to Dr. W. G. Banting, co-discoverer of insulin, who has just returned from a trip to the Arctic on the Government steamer "Boothby."

Gradually increasing contact with white men is slowly changing the Eskimo character, according to Dr. Banting's observations. The trading companies, he said, are converting the natives from tribes of hunters to trappers. They are being outfitted with woolen clothing, tobacco, weapons, etc., and sent out to trap furs. As a result their industry in hunting the caribou and other animals used largely in native economy is neglected. The native costume and to some extent native diet, are being transformed as a consequence.

The native costume of the Eskimo, made of caribou skin, is being replaced by woolen clothing. The native diet, which was largely caribou meat, is being replaced by white man's food. The Eskimo is being converted from a hunter to a trapper.

Vancouver.—Predictions of a 400,000,000-bushel wheat crop from the 1928-29 season and statements of faith in the prosperity of Canada came from a group of Eastern Canadian financiers who arrived in Vancouver. They are Sir John Aird, Sir Joseph Flavelle, Sir Thomas White and Sir H. L. Macdonald.

Sir John Aird and Mrs. Logan, respectively of the Canadian Bank of Commerce both predicted a 400,000,000-bushel crop.

Sir Joseph Flavelle, speaking of the coming meeting of the Canadian Chamber of Commerce, said: "This country has been the vast distance that divides our communities, I am sure any business man creates facilities to bring Canadian business in contact with one another to discuss their mutual problems is deserving of support."

Sir John Aird emphasized the importance of getting more people into the prairie provinces. "The right class—men and women accustomed to a fairly good standard of living, and who can adapt themselves to prairie standards in Canada. The best class of new settlers comes from the United Kingdom and the United States," he said. Sir John was impressed with conditions across Canada. "Conservative optimism" was the trend of his remarks.

Fire Prevention Week Begins October Ninth

Proclamation Contained in Extra Edition of Canada Gazette

Ottawa.—An extra edition of the Canada Gazette contains a proclamation appointing the week commencing October 9 "fire prevention week" and calling upon citizens of the Dominion to observe the day.

The proclamation, which is signed by the Governor General, calls for fire prevention in schools and institutions. Fire prevention officers are asked to see that the fire prevention week is observed in the Dominion.

The proclamation is signed by the Governor General. The proclamation is signed by the Governor General. The proclamation is signed by the Governor General.

SUNDAY SCHOOL LESSON

SEPTEMBER 15

THE KINGDOM DIVIDED

Golden Text: "Pride goeth before destruction, and a haughty spirit before a fall."—Proverbs 16:18.

Lesson: 1 Kings 12:1-24.

Devotional Reading: Proverbs 1:20.

Explanations and Comments

1. The Request of the People, verses 1-5. Rehoboam, Solomon's son, had been king of Israel for 41 years. He was a weak man, and his people were discontented with his rule.

2. The Request of the People, verses 6-10. Rehoboam's advisers were divided. Some advised him to be kind to his people, and others advised him to be hard on them.

3. The Request of the People, verses 11-15. Rehoboam decided to be hard on his people, and they rebelled against him.

4. The Request of the People, verses 16-20. Rehoboam's kingdom was divided into two parts, and he was no longer king of all Israel.

5. The Request of the People, verses 21-24. Rehoboam's kingdom was divided into two parts, and he was no longer king of all Israel.

B.C. Fostering Seed Growing

Eighty-Five Acres Now Devoted To

Victoria, B.C.—The Ministry of Agriculture, B.C., is fostering seed growing in the province.

The province's agriculturalists in the Pacific Coast province 85 acres are now devoted to flower seeds, with 100 acres more to be added.

Production of red clover seed is proving most successful, over 500 acres being harvested at Shuswap last year, and a substantial increase in crop being made this year. Gratifying results are reported from the Valley Valley in timothy seed production.

Jamaica Buys Douglas Fir—Montreal.—Word from Kingston, Jamaica, points out that the latest Government estimate shows the island to be a large user of Canada's Douglas fir. There was an increase of one hundred per cent in Canadian exports in the year and practically all the Douglas fir imported was sent from Canada.

Two Killed in Collision—Calgary.—Two trainmen were killed, one passenger injured, and more than a score suffering from slight injuries, when a passenger train collided with a freight train at Calgary, B.C., last night.

N.B. Under Liquor Law—Saint John, N.B.—The liquor act, 1927, is now in effect and the prohibition of the sale of liquor in the province since 1916 has passed out of existence. Nineteen Government retail liquor stores are operated. License will be issued to private retailers, after the practice adopted in Quebec.

Premier King May Visit U.S.—Ottawa.—Premier W. L. Mackenzie King may visit the U.S. shortly for a tour of inspection of the U.S. Navy and the U.S. Coast Guard.

U.S. Navy and Coast Guard—Ottawa.—Premier W. L. Mackenzie King may visit the U.S. shortly for a tour of inspection of the U.S. Navy and the U.S. Coast Guard.

WINTER CARE OF THE DAIRY HERD
(Experimental Farms Note)
Dairy cattle have been kept at the Dominion Experimental Station at Guelph since 1914, and although methods of feeding and management are in some respects different from those in most herds, the health and vigor and productivity against all animal complaints the herd are such as to justify what has been done. Cattle do not seem to know whether the stable is painted or unpainted, whether it is made of dressed lumber or logs, their production and condition of health does not seem to vary with temperature. There are, however, affected by feeds, regularity of feeding, draughts exercise and sunshine. The cows in milk and the calves dropped after July let are kept in stables free from draughts and so ventilated as to be supplied with dry fresh air but not warm, the temperature frequently dropping below zero. It is convenient for the herdman to have water in the mangers but the temptation then is to deprive the cows of sufficient exercise and sunshine. If turned out twice daily for water irrespective of the weather the cattle are more healthy. Calves dropped before July 1st, bulls and unfreshened heifers do not require stables. They thrive in corrals having pole and straw shelters over the south end. When provided with plenty of fresh bedding they do not seem to mind the low temperatures although wind does affect them adversely. It is better if the shelter can be closed in time of a storm. Cattle can be carried through the winter under such conditions, increasing in weight if they have sufficient feed of the right kind. They thrive on plenty of hay or oat straw and ensilage with a little meal. They thrive better fed, watering and milking are carried out with regularity.

W. A. Manro,
Dominion Experimental Station,
Guelph, Ont.

Studebaker WINS AGAIN
That the Studebaker Commander has again lived up to its name is not performing any car, either six or eight, selling at a price under \$5,500 was demonstrated recently when it ran away with the hill climbing of a field of six or more competitive cars at Arrowwood. This word has just been received by Roy Smith local Studebaker-Engle distributor.
The Arrowwood test was made on Little Axe Hill, which has long been looked upon as impossible. Although automobiles have been driven over it, low gear has been used for the most part in traversing its quarter mile of rough, steep grade.
The Studebaker Commander, starting in high from a standing start, went to the top of the hill in 46 and one-fifth seconds, and thereby beat the time of two competitive cars, one of them a Fordster, which made the hill-top in 60 and one-fifth seconds and 60 and one-half seconds respectively.
The Commander also won the second test over Little Axe Hill, before an admiring crowd of more than one hundred persons. With a running start the sedan, driven by A. N. Smith of the Motor Service Co., Studebaker distributor, of Calgary, again climbed the hill, this time in 35 seconds, out-timing the nearest competitive car by 5 and one-fifth seconds. One of the competitive cars was a six cylinder model; the other an eight.
Finally to prove conclusively that the Commander was the best hill climber in the field, Smith loaded five passengers besides himself into the sedan and pulled the hill in high, crossing the bridge at the top of the hill at a speed of 25 miles per hour.
The contest was timed and judged by Chief Smith, of the Calgary Fire Department, who rode with each contestant.
"Can you spell 'avoid' 'key'?"
"Sure, teacher. Yet 'de' void!"

THE BASSANO MAIL
Wallace J. Smith
Editor and Publisher
Subscription \$2.00 a year, \$2.50 in the United States
The weather man is in a perverse mood this fall. He has been giving us just the kind of weather we do not want.
Dempsey just got out of a lawsuit, and now Tunney is mixed up in one. These big time fighters seem to take on a legal battle about as often as they sign for a million dollar sale encounter.
THE WHEAT POOL AND PRICES
Whether or not the Canadian Wheat Pool has caused a general upward trend in the price of wheat is a problem that is commanding the attention of every farmer and every one interested in the grain trade.
The London Daily Herald, seeking expert opinion on this subject, consulted E. F. Wise, an English political economist. Mr. Wise gave it as his opinion that the pool had raised the price of wheat, but that as a direct result of the pool, the price of wheat had been settled or stabilized for the Canadian farmer, and speculative profits reduced.
If the Wheat Pool has reduced speculative profits it has justified its existence. The farmer is not in the speculative game. He produces the wheat, and under the old system, sold his grain to the grain companies. The speculators did not make their profits out of each other; they made them out of the farmer. The speculative profits have been reduced, and therefore the farmer gets a larger profit.
Opponents of the Pool seek to explain that non-pool farmers obtained a higher price for their wheat than pool farmers. Doubtless this has happened in some cases. But the Pool has had an influence on the market. In order to get in business grain companies have found it necessary to pay a higher price for the farmers' wheat than they would if the Pool did not exist.
WHAT DO THEY SAY?
With so many lives lost in trans-oceanic flights, the average person is inclined to ask "What is the good of it all?"
It has already been demonstrated that it is possible to fly across the Atlantic. Acock and Brown were the first to do it back in 1919, and recently Lindbergh and Chamberlain and others have accomplished the feat. Further flights across the Atlantic would probably accomplish no actual good, but the fact that there are many men who are willing to risk their lives in this hazardous undertaking just for the sheer joy of it demonstrates that the spirit of daring, that irrefragable urge to pit wit and physical strength against the powers of nature, is still a potent, unquenchable fire in the make-up of man's nature.
It is that indomitable spirit that has been the driving force in all lines of discovery and scientific and social progress. Columbus had it when he sailed westward in a frail wooden boat that his contemporaries said would topple over before it got to the shore, that our earth was just a tiny sphere in the vast of a vast universe; Franklin, Scott, Peary, and Amundsen had it when they braved the hardships of the Arctic and Antarctic in search of the poles.
Ulysses, that colorful character in Greek mythology, was sponsored of a full share of the "urge to seek and find, and he says, in the words of Tennyson:
I cannot rest from travel: I will drink
Life to the lees.
How dull it is to pause, to make an end,
To rust unburnish'd, not to shine in use!
As tho' to breathe were life! Life piled on life
Were all too little, and of one
Little remains; but every hour
Is saved
From that eternal silence, something more,
A bringer of new things, and vile it were
For some three suns to store and store
This hard won ease, that soul-wayward
To follow knowledge, like a sinking star,
Beyond the utmost bound of human thought.
Although no immediate good may be accomplished by further trans-oceanic flights, it is only so long as man possesses this spirit of daring and urge to seek and discover, that the world will continue to progress.

HAMLET'S SOLILOQUY ON LIFE AND DEATH
To be or not to be—that is the question:
Whether 'tis nobler in the mind to suffer
The slings and arrows of outrageous fortune;
Or to take arms against a sea of troubles
And, by opposing, end them—to die—to sleep—
No more;—and, by a sleep to say we end
The heartache and the thousand natural shocks
That flesh is heir to,—'tis a consummation
Devoutly to be wish'd. To die—to sleep—
To sleep! perchance to dream:—ay, there's the rub:
For in that sleep of death what dreams may come,
When we have shuffled off this mortal coil,
Must give us pause; there's the respect
That makes calamity of so long life;
For who would bear the whips and scorns of time,
The oppressor's wrong, the proud man's contumely,
The pangs of despotic love, the law's delay,
The insolence of office and the spurs That patient merit of the unworthy takes,
When he himself might his quietus make
With a bare bodkin? Who would fardels bear,
To grunt and sweat under a weary life,
But that the dread of something after death,—
The undiscovered country from whose bourn
No traveller returns,—puzzles the will,
And makes us rather bear those ills we have
Than fly to others that we know not of?
Thus conscience does make cowards of us all;
And thus the native hue of resolution
Is sicklied o'er with the pale cast of thought;
And enterprise of great pitch and moment,
With this regard, their currents turn awry,
And lose the name of action.
—Shakespeare.

2 Bay Mares, weight 1500 lbs., branded as above and also on right shoulder.
Buckskin saddle pony, branded.

ANDY HOLM, GEM.

PAINTING - CALSOMINING. Painting, Calsomining, minor repairs, plaster building. CHAS. S. WILSON. Box 277, Bassano. 3-17-c

H. W. Ford was in Hrusar Wednesday on business.

E. P. Purcell, of Brooks, was in Bassano on Monday.

Jack Clark, of the J. C. Hancock, was in town on Monday.

Mr. Rutherford, of Jas. Johnston's store, spent Sunday in Calgary.

Edie Stiles was down from Hrusar for a few days this week.

Ralph Baker, of Hrusar, is spending a few days in town this week.

Miss E. McArthur is a patient in the hospital with an attack of the flu.

Enriquez and J. J. Hrusar, residing in Wayne where he is school principal.

Miss M. K. Patrick and Mrs. J. W. Bulmer motored to Calgary on Monday.

Mrs. E. J. Bell and daughter Zona, of Hrusar, were visitors to Bassano last Saturday.

A son was born to Mr. and Mrs. A. E. Shatt, of Hrusar, on Saturday Sept. 10 in the Bassano Hospital.

A son was born to Mr. and Mrs. I. Phil, of Lathrop, on Thursday, Sept. 15th, in the local hospital.

A. E. Bearcroft of Majorville, was brought to the local hospital on Tuesday with a broken leg. Mr. Bearcroft was kicked by a horse.

Mrs. Chas. McKinnon left on Tuesday for Durham, Ontario, to where she was called by the sad news of the death of her mother.

Mr. and Mrs. W. H. Buchanan and baby returned on Wednesday from Calgary where they have been spending a week with Mr. Buchanan's parents.

G. Kortvedt was in from his farm near Hrusar. He says that with fine weather many crops that were damaged by hail will have partly recovered and ripen.

Jaques Bulmer returned home Monday from Calgary where the schools have been closed because of the infantile paralysis epidemic.

A son was born to Mr. and Mrs. Hrusar, of Hrusar, on Saturday Sept. 10th.

D. T. Bennett, who is now living at Benalto, was down for a few days to see how things are going on his farm east of Bassano. He says the crop here is much better than his crop at Benalto.

S. Leonard, Florence and Lloyd, returned from Ontario where they have been spending the holidays. Mrs. Leonard and Fred also came home after a visit to Mrs. Leonard's relatives in Saskatchewan.

The Rev. St. Denis, of New Westminster, B. C., is conducting revival services in Knox Church this week. Service is being held every evening at 7.45 from Wednesday, Sept. 14th up to and including Wednesday, Sept. 21st.

MISCELLANEOUS SHOWERS

A miscellaneous shower was held at the home of Mrs. C. W. Hayes on Friday evening, Sept. 9th, in honor of Miss Peggy O'Neill. Twelve girls friends of the bride-elect were present, and the early part of the evening was devoted to bridge. Miss V. Tierney won first prize, and the consolation went to the guest of honor. The consolation prize turned out to be many beautiful and useful gifts for the bride-elect, and they were carried in on a large tray topped with a bouquet of flowers.

Here and There

Four ships, arriving at Vancouver within one week, brought more than \$20,000,000 worth of silk from the Orient, for trans-shipment to New York. This is the heaviest movement of its kind on record along this coast.

The Canada Colonization Association, a subsidiary of the Canadian Pacific Railway for the settlement of privately-owned lands in Western Canada, in the first six months of 1927 accepted for the placement of 401 families on 57,944 acres of land.

The first passenger trip of the Lettbridge Commercial Airways was made on August 5th, between High River and Lettbridge by a plane piloted by Jack Palmer. It is announced that commercial flights will be arranged between Lettbridge and Waterton Lakes.

Already the muskrat has come to land all other furbearers of the Dominion in the total value of peltry sold, not alone by reason of the great number of pelts taken, but on account of the remarkable rise in the price of the fur. In the older days furs sold in London for a few cents apiece and in open more recent times.

The House of the Mighty

A certain officer went calling on the village belle. The old man kept a very vicious hound that was left snarled at night. When the captain had finished with the captain the rest of the latter's trousers was missing. His brother officers, looking him about his predicament, asked if the girl was worth risking his anatomy in that fashion. The captain replied: "Maybe not, but I have always been willing to give up my seat to any lady."

Infantile Paralysis

Acute Poliomyelitis. General Precautionary Measures. From the Alberta Public Health Bulletin.

Keep children away from crowds. Allow them to play outdoors as much as possible, but not in contact with large groups of other children. Keep them by themselves as far as possible. Give children wholesome and easily digested food, including plenty of milk and vegetables. Raw vegetables and fruit should be thoroughly washed before being eaten. Milk should be kept cold and carefully protected from flies.

Children should be given a daily tub bath, and their clothing should be washed frequently.

Children should have ample rest. Twelve hourly sleep in a well ventilated bedroom is a good rule to follow. Keep the bedroom windows open.

The home should be kept thoroughly clean, and free from flies or vermin of any description.

Keep the home free from dust, but avoid dry sweeping and dusting. Sprinkle the floor with pieces of dampened paper before sweeping, and use a cloth which has been moistened for dusting.

Inasmuch as there is a great variation in the onset of Poliomyelitis, at a time when the disease is prevalent, children showing any evidence of a departure from normal health should be carefully watched and isolated. It is urgent that prompt medical attention should be given in all cases.

The abortive or very mild types of the disease which recover in a few days without any paralysis, and the carriers who harbor the virus of the disease in the nose and throat but do not develop the disease, are now known to be most important factors in the spread of infection and render control of the disease an extremely difficult problem.

In patients suffering from the disease, careful attention should be given to the prompt disinfection of all nose, throat, and bowel discharges, and to articles soiled therewith.

When the disease is prevalent, all children known to be ill and not receiving medical attention should be reported to the Local Board of Health.

The quarantine period in Poliomyelitis is three weeks from the onset of the infection. Exposed children of the household and adults of the household whose vacation brings them in contact with children, or who are food handlers, should be quarantined for fourteen days from last exposure to a recognized case.

"There Will be Showers of Blessings"

at Knox Presbyterian Church, Bassano

Sept. 14th to 21st Special Evangelistic Services

conducted by FREDERIC ST. DENIS

Services every night at 7.45

Lord's Day—11 a.m., 3 p.m., 7.30 p.m.

Children's Meetings—Thursday, Friday, Monday and Tuesday, 4 p.m.

Young People's Rally Monday Night

The Gospel in Song and Story

That Settles the Matter

- of - What the new Ford will be like

Absolute knowledge I have none, But my son's washerwoman's son Heard a policeman on his beat Say to a laborer on the street, That he had a letter last week Hand written in the finest Greek From a Chinese couple in Timbuctoo Who said that a son in Cuba knew Of a colored great in a Texas town Who got it right from a circus clown That a man in Klondike got the news From a gang of American Jews About some fellow in Borneo Who new a man who claimed to know A hermit who lived beside a lake Whose mother-in-law will undertake To prove that a friend's sister's niece Has stated in a nicely written piece That she has a son who knows about

The time the New Ford Car comes out.

BUT— It will be a hummer when it comes out! And—it will be money in your pocket to wait until it does come out.

IT WON'T BE LONG NOW

Enduring Quality at LOWER PRICES

Makes Pontiac Six the Best Investment Value

MEN who look upon an automobile from a hard, dollar-and-cents standpoint are just as emphatic in their praise of Pontiac Six as those who seek primarily the beauty, smoothness and comfort which Pontiac provides.

The enduring quality of Pontiac Six—its ruggedness and staying power—gives it the lowest depreciation and the highest resale value of any six-cylinder car in its price class.

Front a business standpoint, the New and Fine Pontiac Six represents a sound investment in reliable, comfortable, economical automobile transportation—protected by the lasting quality of the car and the staunch integrity of its makers.

And the New, Low Prices make Pontiac Six a more attractive investment than ever.

WORLD HAPPENINGS
BRIEFLY TOLD

Boeing New York by air is scheduled by taxi. The same route covered by an airplane at a cost of \$1 will run up a taxi bill of \$14.15.

Wynne D. Wagner, general counsel of the anti-slavery league of America, died at Bathurst, New Brunswick, recently, due to a heart attack.

Immigration to Canada for the month of July, 1937, totaled 32,258, made up of 5,432 from the British Isles, 2,161 from the United States and 1,155 from other countries.

Ernst Vierkotter, who won the Canadian National Exhibition marathon swim in June planning a village tour, after which he will likely enter motion pictures.

The purchase of 16 quarter sections of land, involving \$56,225, was the result of the visit of a party of land seekers from Nebraska and Kansas to the Bison, Arroyo Valley and Snipe Lake districts in Saskatchewan, recently.

Communal rioting at Nuremberg, capital of the central provinces, British India, resulting in the death of 15 persons, is reported by the Bombay correspondent of The Exchange Telegraph. Many families are leaving the city, fearing renewal of the trouble.

Commander Richard E. Byrd states that he has planned to leave New York next August on his South Pole expedition and that Philip Benneville, who accompanied him on his flight to the North Pole, would be second in command of the expedition.

The American Club Committee, after hearing Sen. Charles McNary, French aviator, who recently declared he had made an eleven day, 12,000 mile, (4,500 feet) solo flight, decided unanimously not to register his record of August 25, and to designate Caimon for life.

In Britain, foreign minister, acting as president of the allied conference of ambassadors, has formally notified M. Stresemann, Germany, that the allied army of occupation in the Rhineland will be reduced from 70,000 to 30,000 men. Details of the reduction will be announced.

The death occurred at Montreal after a long illness of Samuel L. Kydd, late editor of The Montreal Gazette. Mr. Kydd joined the staff of the paper in 1914 as a compositor and before being promoted to the position of chief clerk almost every kind of office in the newspaper had been under the editor's post last year owing to falling illness.

Fatal Automobile
Accidents in Canada

Over Six Hundred Persons Were Killed During 1936

The Dominion Bureau of Statistics issued a special report on deaths from automobile accidents in the nine provinces of Canada during the year 1936. Under this title are included the accidents in which automobiles are involved in collision with other vehicles, such as horse-drawn vehicles, street cars, etc.

In the nine provinces of Canada deaths from automobile accidents totaled 608 for the year 1936, made up as follows: Prince Edward Island, 1; Nova Scotia, 21; New Brunswick, 11; Quebec, 183; Ontario, 182; Manitoba, 27; Saskatchewan, 16; Alberta, 25; and British Columbia, 45. For the whole country the death rate from this cause was 6.5 per 100,000 of population. The individual provinces giving the following rates: Prince Edward Island, 3.2; Nova Scotia, 6.2; New Brunswick, 2.7; Quebec, 2.1; Ontario, 7.7; Manitoba, 4.5; Saskatchewan, 2.6; Alberta, 6.4; and British Columbia, 10.6.

In the nine provinces 415 of the deaths due to automobile accidents, or 73 per cent. of the total, were of males; deaths of females numbered 193, or 27 per cent. of the total. Under 16 years of age constituted 186, or 31 per cent. of the total. In this age group there were 12 male and 16 female deaths, a proportion of 16 to 11 in the mortality of the two sexes.

Supports Bay Route
Endre support for the opening of the Hudson Bay route is given by the Rev. John Johnson, minister, one of the most independent members of the Maritime provinces.

The plan is being thought. It should be explained for the fact that the results will fully meet the expectations of Maritime and Canadian people. They have made a resolution for what they believed to be their duty, and the rest of the country should wish them an good luck.

A fool and his father's money are easily separated.

W. N. U. 1937

New Wireless Stations

Prospect of Improving Communication Between England and the Dominion

In addition to the beam wireless stations between England and the United States which are almost ready to be in operation, new stations are being built for service between England and South Africa, and between Canada and Australia. The erection of the Indian beam stations completes the contract of the Marconi Company to provide telegraph communication for the British Government, but by no means completes the immediate prospect of improving communication between England and the Dominion.

Canada's Mineral Resources

Sir Robert Horne Says Dominion Offers Great Field for Development

Sir Robert Horne, who has returned to England from Canada, where he attended the Mining and Metallurgical Congress of the British Empire, spoke with confidence of the future of the Dominion, especially in relation to her vast mineral resources. He said it was fitting that the metallurgical conference should meet in Canada because the mineral resources of Canada offered the greatest prospect for the development of any in the world.

He continued: "They have only just scratched the mining areas of the Dominion up to now. There is a wave of enthusiasm for prospecting minerals in Canada which can be witnessed nowhere else."

Make Clink From Fish Scales
Fish prepared for consumption is rich for waterproofer their scales by using as canoes. Popular Mechanics magazine says. The scales prepared the fish by mixing the scales of fish with twice of various paints and boiling the mixture. The materials to be waterproofer are then dipped in this oil and allowed to dry.

Man Should Bore Holes in Earth to Obtain Heat Supply
Man should bore holes to get heat from the interior of the earth instead of destroying a highly elaborate substance like coal, the British Association of Service was told by J. L. Hodgson, mechanical engineer.

He declared that heat stored in great spheres inside the earth is at least 30,000,000 times that available in the world's coal reserve. Hot rocks are found, he said, only about 35 miles below the surface and much nearer in volcanic areas.

The speaker said he advocated drilling shafts five miles apart. Workers boring the holes would be protected by heat proof suits, including liquid air containers to supply cool dry air.

The lecturer estimated that a cubic mile of hot rock would yield as much heat as burning 200,000,000 tons of coal.

"I only wish," said the teacher, experienced by the magnitude of one of her small pupils, "that I could give you mother for a week."

"All right," replied the youngster, cooly. "I'll speak to father about it."

Teacher (during history lesson): "What are the races that have dominated England since the invasion of the Romans?"

Small Boy: "The Dorby and the Grand National, mias."

Diamonds can be identified by means of ultra-violet rays, under which the stones give off various colors which can be photographed.

"Oh, George, I've been stung by a bee. What shall I do?"

"Put some ammonia on it," "But it has flown away,"—Titi-His.

A wonder why they say "Amos" and not "Amonen" Bobby.
"Because they also means and not 'thee, supple."

Goes To Argentina

Work At Lister Institute in London Is Interesting

There is always a steady demand, from laboratories and hospitals in all parts of the world, for a variety of every known description and variety for experimental purposes.

Because of this, there is maintained at the Lister Institute, London, what is known as the National Collection of Type Cultures. Here a large and expert staff is engaged in rearing, raising and bottling bacteria.

When I called there recently, writes a London journalist in Pearson's Weekly, I found everyone busy intensely over his delicate work. In cabinets along the walls were drawers upon drawers of tubes, all carefully labeled and labelled, and sealed with wads of cotton wool.

The desks were fitted with Bunsen burners, still, incubators and much other complicated apparatus, while in the centre, directing operations, stood the curator, Dr. R. St. John-Roberts.

Gradually, I was assailed by an intense feeling, as I realized that I was literally surrounded by millions of disease germs. (And, a little later, I felt positively unclean when Dr. Roberts held a tube under my nose and murmured melancholically: "Pleasure to you.")

Despite the coolness with which the experts handle the tubes of germs, however, they are by no means immune from infection, and I heard of a serious bout of illness as a result of his fine work.

Some of the bacteria are "cranky" borders, and for their special collection a special table sort of kitchen is maintained.

The food is slightly different in many cases, and it is necessary to eat particular food. There is one variety of germ which is partial to nothing but beef tea, while others in the assembly turn out of their food into alcohol.

One sort live in curdled milk, another the temperature of our blood. Some are so fastidious that they will not stand the air.

When, therefore, you remember that bacteria are well over two thousand different sorts of bacteria, you can understand the vast amount of study and work that is involved. New varieties are continually being discovered and sent from all parts of the world to be added to the collection.

Not only are the organisms associated with diseases kept in stock, however. There are also tubes containing the little change carefully preserved from cheese, yeast and beer.

Other varieties associated with veterinary complaints are there too, besides those responsible for the food. All the different strains are carefully listed in a catalogue; and millions of germs may be bought for a shilling. But it is necessary to explain to the buyer just what "medium" the organism is preserved in, and because of this a careful labelling system is used. From the color of the cotton wool plugs has a certain significance.

Texas Has Rubber Tree
The only rubber tree in Texas is said to have been discovered on premises in Orange. The owner started to cut it down, but observed that it was of unusual type, and as a result some inquiry was made among the neighbors, who recalled the fact that a life owner of the place set out the rubber tree plant many years ago. The tree at the present time is a foot in diameter and in a thriving condition.

British School Boys Visit Canada
A party of British public school boys arrived in Canada on Saturday on the White Star liner Albertic to make a tour of Montreal, Ottawa, Toronto, Algonquin Park and New York, to become better acquainted with Canadian boys and to understand the points of view of other nations by means of personal friendship. They are in charge of Rev. R. B. Fallow-Purrow, M.A., F.R.G.S., of Ross University, third from the left in the front row, and Rev. Howard T. Knox, M.A., of Oxford University, on the extreme right.

Wool From Pink Needles
Wool is being made from pink needles by a process recently perfected in Germany. In addition, it is being strong fibers, the needles are constructed from the needles is valuable in the manufacture of illuminating gas.

A large portion of our standing army does a stunt on the street car and buses during the rush hours.

Pyrethrin is the parent of many disagreeable qualities.

Sooner or later the crooked man will find himself in a jam.

Guns Replace Wedding Bells

Heavy Toll Of Life In Attempts To Span the Ocean

The 63-year-old Princess Anna Lovelace-Worthen is the second woman to disappear in an attempt to transatlantic flight with a plane or a little over two weeks. The first was Miss Mildred Doran, passenger in one of the planes participating in the solo prize race from Oakland, Calif., to Hawaii.

As it does, there, other than the prices' competition, Captain Leslie Hamilton and Col. T. F. Minehan, who have disappeared at sea during the present flying season, followed by Captain Charles Nungesser and Capt. Francis Collett left to Bourget, May 8, for New York, in a fight for the 'Orville prize, subsequently won by Col. Charles A. Lindbergh.

The bang of many guns which took the place of the conventional wedding bells when Miss Viola Hamilton of Oshawa and Dr. M. Robinson of 108 motion were married recently in front of the Bufton Gun Club House.

The happy couple had plans to be married in the evening but enthusiastic marksmen attending the Alberta Trap Shooting championships refused to be denied and fired volley after volley in honor of the couple who drove immediately to the Bufton Springs Hotel for their honeymoon.

The ceremony took place on the very spot where the groom had just finished a run of 25 straight targets.

Explosion Of Sun Would Shrivelled Earth

And Would Destroy Life In Few Minutes
Says Engineer Professor

An explosion of the sun, similar to that which occurred recently on the star Nova Aquilla of 1917, as it is designated, would bring death and destruction to the earth, according to Professor E. B. Frost, of Yerkes Observatory.

The expansion, or explosion of the star, similar in type to the sun, was predicted recently by Dr. Max Wolf, of Heidelberg University, and was confirmed by photographs taken at Harvard University.

"These stars," Professor Frost says, "are believed to be doing to our solar system like release of inter-atomic energy, drop very likely to the inevitable heat of the sun's interior. Temperatures inside the stars vary from 500,000,000 to 1,000,000,000 degrees Fahrenheit."

"If this energy, suddenly released, driving from the stars the scorching gaseous shells which reach the planets in the wake of shattering heat. The stars are not destroyed by the explosions, the nucleus remains and in time acquires another gaseous shell," the professor said.

The heat from an explosion of the sun would reach the earth in about eight minutes and would be followed by the deadly gases in 128 hours. The explosion he believes would be but a matter of a few minutes over the entire earth, which would be shrivelled."

Might Have Two Meanings
They had been married just five years, and, as was her usual custom, the wife had made her husband a

"George dear," she said, "it's our fifth anniversary, and I've baked a fruit-cake for you."

Her husband put down his paper and took off his spectacles. It was easy to see that he was preparing to make a speech. He cleared his throat.

"How thoughtful of you, my dear!" he replied. "I have always looked back on the previous cakes as delicious in my life."

The ceremony took place on the very spot where the groom had just finished a run of 25 straight targets.

Invade Railroad Field

Number Of Women Employees Is Rapidly Increasing

The rapid advance that women have made in their participation in railroad work during the past seven years is signalled in figures published in the annual report of the Interstate Commerce Commission. It reports that in the period under review the number of women employed on Class I steam railroads has increased from 1,000 in 1929 to 1,500 in 1936. This was one-tenth of the total staff.

Women in 1936 is given as 61,302.

Women were employed in almost every branch of railroad service last year, including two in each operation and 250 in each terminal. The most numerous class was naturally that engaged in clerical and semi-clerical occupations, accounting for 53,117, the magazine reports. The next largest class in 1936 was that employed in cleaning, namely, 5,322; other large groups being "personal services" (waitresses, maids, etc.), 3,114, and telegraph and telephone operators, 1,427.

Just Husband—This steak tastes queer.

John Bride—"I can't understand it. I know I burned it a little, but I rubbed some vasoline on it right away."

Deaf worshippers in a Pulham church are now supplied with earphones so that they may hear the choir in the service by means of a microphone.

London Lady (tenderly arguing with her more stylish opponent, in the park)—"If yer skirt was as long as yer tongue, yer wouldn't be showin' yer knees."

The mortality of pleurisy has been markedly reduced as a result of the introduction of clay targets. Why not clay pedestals?

Musical—"Do you love a" phant-for?"

Mr. Dumme—"Yes, Forte dolzino down to the moon."

Canadian wheat is necessary to make palatable bread; Russian or Australian flour is unnecessary.

When misfortune reaches a man's house, it falls right in without knocking.

The only two places that contain everything are the world and a drug store.

Wyming is attempting to round up the thousands of wild horses in the state.

New Narcotic Gas

Brings Deep Sleep and Has No After Effects

At the last meeting of the Medical Society in Berlin, Professor Nager described his experience with a new narcotic gas, recently known as R. 107. Up to the present, it has been customary to use either ether or chloroform to produce unconsciousness in surgical operations. Recently introduced another means, a pure gas called methohexal, a state of perfect anesthesia, but no further unconsciousness has not become general.

It was not any danger connected with the use of ether or chloroform which induced the attempt to produce R. 107, but the discomfort connected with their use. Many sick people are unpleasantly affected, by ether or chloroform, the food of the mask, the choking sensation, the knowledge that they are being put to sleep by force, combined to make them nervous.

On awakening they are placed with their eyes closed, and they are not aware of anything. It is a sleep of unconsciousness, during which no pain can be felt and no action is required. The drug has no effect upon the heart, but sometimes affects the breathing.

"Other physicians value their experience to the society. About a thousand cases of operations with R. 107 were reported, but the medical profession does not seem to be inclined to form a definite opinion as to the value of the drug until far more evidence has been brought forth. For the present, the drug is being used only in cases where the patient has been confined to a few great surgical stations for continued experiments.

Advertising Helps Credit
Merchant Who Is Constantly Advertising Is Always Successful.

There is one way by which a business man's credit is improved and that is by a policy of constant advertising. It is the only way by which the public knows of his existence. It is the only way by which they know if they are getting the best value for their money. It is the only way by which they know if they are getting the best value for their money. It is the only way by which they know if they are getting the best value for their money.

Foot Troubles
wear your
nerves
ragged
Get rid of that weariness and pain your feet are giving you. It is taking more out of you than you realize.
Let us demonstrate to you how the correct Dr. Scholl's Foot Comfort Appliance or Remedy, guaranteed to relieve your particular foot trouble, will give you the thrill of a good brisk walk again, and the joy of being on your feet all day long with perfect comfort.

Instant Relief from Bunions
Dr. Scholl's Bunion Reducer is the only device that not only relieves the pain, but also allay the swelling and pressure. Prescribed by the foot doctor.

(Clareholm Press)
Mr. Swain, formerly agent for the Robin Hood elevator in Clareholm, and now operating a house of his own at Joffre, passed through town on Thursday accompanied by Mrs. Swain and their two daughters, on their return from an extended motor tour to the coast. Mr. Swain gave the Local Press a friendly call, having an early day's acquaintance with the old boom town of Bassano. While driving through Cranbrook his finger was stung by some insect, and by the time he reached Granum the finger had become infected and required medical treatment.

Local News

A daughter was born to Rev. and Mrs. Robt. Little in Edmonton, on Sunday, Sept. 11th.

Wm. McLaws attended the Conservative convention held in Calgary on Thursday this week.

Miss Norma Milroy returned home Friday after spending the summer vacation in Ontario.

Miss Cummings, of Winnipeg, and Miss Munro, of Toronto, are visiting with their cousin Mrs. Wm. McLaws.

Louis Voranto was fined \$1.00 and costs in local police court this week for a breach of a section of a town by-law by creating a disturbance in a public place.

Miss Thekla Grabowski, formerly a member of the Bassano Hospital staff, was married in Banff on Wednesday, Sept. 14th, to Dr. Neil Christie, of Calgary.

LOST DOG
LOST—Aldale pup, striped, on Thursday from rear of St. Andrew's. Finder please return to Wing & Wong Shoe Repair Shop, Bassano 10-9

The Department of Lands and Forests of the Province of Quebec have planted 1,600,000 trees this year—a record figure and nearly double that of last year. Next summer it is proposed to plant 3,000,000 trees.

Canada's net debt decreased by \$32,498,429 during the first four months of the fiscal year. The gross stands at \$2,995,335,910. During the corresponding period of last fiscal year there was a decrease of \$41,251,655. Both revenues and expenditures show increase.

Tourist travel this season is in excess of previous years and is even more cosmopolitan in its derivations than formerly, according to C. E. E. Umber, general passenger traffic manager of the Canadian Pacific Railway, based from a survey of inspection of the company's interests at Banff, Lake Louise and other favored tourist spots.

E. J. Chambers, President and General Manager of the Associated Fruit Growers of British Columbia, states that British Columbia apples are now being sent to South Africa, China, Sweden, Norway, Germany and Denmark, as well as Great Britain, the heaviest market. New York and Chicago are big consumers of Canadian apples, which are sold and delivered.

A further party of 40 students representing many colleges in the British Isles arrived on the Canadian Pacific steamship Montrose and proceeded to the field of Western Canada in the care of the C.P.R. Department of Colonization and Development. They will be placed upon farms in Saskatchewan for the duration of the harvest by the British Women's Immigration League.

Construction of the first commercial fish hatchery in Alberta will be started in September, announces R. T. Rodd, Dominion Fisheries Inspector. It will be located at the mouth of Canyon Creek, on the south shore of Lester Lake. It is estimated that 100,000,000 whitefish will be propagated at the hatchery every year to maintain an undiminished supply of fish for the fishery companies operating in the lake.

So great is the interest which is being evidenced in the Scottish music festival organized as part of the Highland Gathering for Banff, September 14th, that the Canadian Pacific Railway has arranged with the Alberta Government to install the amplifiers of the public address system that were used at the Diamond Jubilee broadcast, so that the evening concerts will be heard not only in the ballroom of the Banff Springs Hotel, but also in the lounges and in the open air on the terrace.

General industrial transportation and agricultural outlook (from reports reaching him from all parts of Canada) is excellent and will continue to improve as the market for Canadian products widens, said E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, recently at Calgary. "An important factor in the latter will be a steadily increasing population," he said. "The transportation companies, of course, can reflect the general condition of the country, and compared with last year, their gross earnings are higher, but increased costs beyond their control have resulted in lower net earnings."

An official announcement has been made to the effect that the Canadian Pacific Railway Company will construct a line from Midland to Fort McMurray. Public hearings and demonstrations were held in Midland when the announcement was made as the citizens feel that the new line will mean a great deal in building up manufacturing and industrial concerns there.

Trene Castle, formerly well-known dancer, and wife of the owner of the Chinese Black Hawk hockey team, has recently been staying at the Canadian Pacific Hotel, the Algonquin, with her little daughter. They attended the Charlotte County Cottage Radio exhibition pageant which is held at St. Andrews every year. Music dancing and folk song featured at the event.
